SAMPLE CASE

OZONUM

March 2020

I'm the **FREEDOM**-fighter,
the **POET**, who **LIGHTENS UP** all,
who honours the memory of those
who died for **YOU**,
sacred **WORLD** freedom!
the **FREEDOM** to **BREATHE IN** freely
in **PROTECTED** but **INTERCONNECTED** lives.

Acknowledgement

Katerina Cizkova for EN translation
Jana Valentova for CZ transcription
Anne Schadde for remedy proving

Preamble

The client consented to publishing her case.

The transcription has been modified slightly for the communication to remain anonymous and consistent.

Case intake - March 2020, briefly after the closure of borders ZOOM

Client - 41 years, not married, has 2 sisters, manager in an IT company, her partner is a foreigner, they live separately, each of them in their own country, and they visit each other

Background of the case

The client has had a previous experience with homeopathy. She has contacted me, because she has received positive credentials for me. The reason for the consultation is feeling of breathlessness. She is aware that they are of a psychogenic nature. The main trigger is her partnership. Her partner lives in Turkey. Before the borders were closed, they had visited each other often, having travelled the world. The suspension of air transport due to the corona virus epidemic, however, means that she cannot see her partner. Her company has also reduced operation, implying financial insecurity. She is irritated by the fact that she does not know when the anti-epidemic measures end. She is very sensitive to the feeling of lacking freedom, resulting from self-isolation at home and curfew. She is the youngest daughter, doing the shopping for her parents and caring for them; contrary to her two sisters, she is childless. In January 2020, she flew across China, and is convinced that she has had CoVid 19. Again, this is rather a conviction with a certain insight. This is a subjective feeling in the vein of something being inside of me. Tests have not been performed.

(*) The remedy becomes obvious with the first paragraphs. Nevertheless, I let the client speak, and was interested in her experience. There are two motifs: good raport (#) in the therapeutic field and learning more about the hardship in the multi-layered world of clients, needing Ozonum.

(#)

Its Theory and Practice **Carl Gustav Jung** ... in making contact, in establishing emotional **harmony** between the doctor and the patient - what the French psychologists at the time of hypnotic and suggestion therapy used to call 'le **rapport**'.

Note

Important phrases and metaphors are emphasised for easier orientation. Occasionally the rubric is given to paragraphs for reference, definitively not as the exhaustive rubric list.

The front cover page picture

The client pick up a picture on my request capturing her feeling of suffocation and fear of death and added her description of it as if she breathes through [an air resistant membrane](#). See picture on the cover page.

Interesting FB post from Dr R.J.Rowen

[DR. ROBERT J. ROWEN ; @DRROBERTJROWEN](#)

Much more complicated pathology now being discovered with coronavirus. The following is recently published research showing an alarming property of the virus. It appears that the virus can enter red cells and attack the heme protein, which, when properly complexed with iron, carries oxygen to your cells. If this research is borne out, it shows that the virus can kick the oxygen binding iron ion out of the hemoglobin molecule. The red cell, having lot its iron, cannot ferry oxygen to your body. You get horribly short of breath. And, if true, explains why ventilators can do more harm than good. The issue is not lung destruction but red cell dysfunction. The abstract goes on to explain the potential value of hydroxychloroquine, touted by Trump, decried by Fauci and others.

To me, the answer lies in disabling the virus so that it cannot enter cells. Until it is proven otherwise, I believe the best answer will be to oxidize the body to "chop off" the sulfhydryl (S-H) groups the virus requires to open the "cookie jar" (your cells). I discuss this in my YouTube video. If the virus cannot enter your cells, it can do nothing to harm you. And this might explain the continuing very favorable reports I am getting from Europe and China on ozone therapy, whilst there remains a black out in the USA, both from medial and "officials" on this potentially lifesaving therapy, while we are being brainwashed to prepare for a vaccine. I cannot help but wonder if you and I will be forced to get this vaccine at gunpoint, the way things are going.

This research strongly supports the use of hyperbaric oxygen therapy for the disease. But, Pharma cannot make money off HBO.

COVID-19: ATTACKS THE 1-BETA CHAIN OF HEMOGLOBIN AND CAPTURES THE PORPHYRIN TO INHIBIT HUMAN HEME METABOLISM

Warning BLUE box

The patient expressed her dissatisfaction in terms which may imply racism. I distance myself in this regard from her ideas and opinions. I do not think she is racist either. I captured it as the important part of the case and left it uncensored. It is not meant in any way to support discrimination or prejudice against people of other races, or believing that a particular race is superior to another. I would like to apologize to all who may feel offended anyway.

Interview

(verbatim)

Dr: physician, C: client, HG: "hand" gesture

Dr: How can I help you?

C: Well, I have actually, this entire sort of a situation induced by (the pandemic and measures) triggers in me a sort of a feeling of **INABILITY TO FULLY INHALE**. I often feel as if I were to **SUFFOCATE**, because **I cannot inhale**. Otherwise, I'm fine. I am slightly **congested**, but I don't feel ill, I exercise as usual, I am productive, I am not afraid of the illness as such, but all the things around it. What it does is that in the evening I sit and try to swallow and it gets entirely....somehow...here...**it tightens here** and...

[Chest; constriction; anxiety, with]
[Respiration; deep; desires to breathe]

(HG shows a clenched fist at the level of the upper sternum and the beginning of throat)

C: It's like **I cannot swallow**. As if I were to **suffocate**.

[Mind; delusions, imaginations; choked, of being]
[Throat; choking, constricting; swallow, swallowing; agg.]

Dr: Please show me what you are implying with the gesture? What are you expressing by that?

C: When I sit and read the news (media) in the evening, which make me panic. Well... that I actually do not have the **freedom to fly away**. I really do have this linked to freedom. For me, it is about **freedom and along those lines, freedom for me is virtually like an INTAKE OF BREATH or the ability to INHALE**. And always, when I panic when reading. Along those idiotic news on Babiš (the current Prime Minister of the Czech Republic). What he does, and I find it all simply somehow **manipulative and I don't understand it, and then it tightens so that I cannot sort of breathe in** or... But in fact I **want to swallow and suddenly cannot breathe**.

(*)

Dr: You are speaking about the tightening...which you accompany with the gesture of a clenched fist?

C: Here, here, here it won't pass down through this somehow.

Note: (HG: Showing a tightening at the level of throat, where she holds a clenched fist).

Dr: And what are you showing with your hand? I can see a clenched fist. Can you comment on this for me?

C: As if **somebody caught me** and...

Dr: As if somebody caught you?

C: Here, as if inside of the larynx and strangling like this, preventing me from sort of... **swallowing, let alone breathing in.**

C: So...(inhales deeply and exhales)... then I sort of have to make myself **breathe in fully, as much as I can.**

[Respiration; deep; desires to breathe]

[Throat; choking, constricting; swallow, swallowing; agg.]

[Throat; pain; swallowing; agg.; empty]

[Face; pain; jaws; articulation; swallowing, on]

[Throat; pain; extending to; ears; swallowing, on]

[Throat; pain; pain, with; ears, in; swallowing, on]

[Ears; pain; swallowing agg.]

[Throat; discharges, mucus; swallow; must]

[Throat; swallowing; agg.; empty]

[Larynx & trachea; lump sensation; behind larynx, has to swallow]

[Throat; swallowing; constant disposition; drinking cold water amel.]

Dr: Yes, describe it to me, please.

C: (inhales deeply)...in order to be able (exhales)... well, I am slightly relieved, the panic subsides as well, but when I get that panic sort of thing in terms of what will be. I cannot fly away... he cannot fly here (partner), when this is possible. Anyway, what is going on with this country? It's basically situational, I am not downright ill.

Dr: Yes, yes...

C: It is situational, it is really sort of a panic fear of the pandemic or of **what is going to happen next. And freedom. And freedom occurs to me there as the first word.**

Freedom... (inhales) **I cannot inhale.** Then I always tell to myself **inhale-exhale, breathe...**(a longer pause)...

Now I really...last week I really did have a hard time, I was sort of down a lot, I was crying all the time.

[Generalities; air; open; desires]

[Mind; freedom; remarkable, in doing what he had to do]

[Chest; constriction; walk, walking; amel.; air, in open]

[Generalities; constriction; band sensation; belt, as of a]
[Head; pain, headache; pressing; band, as from a]

Dr: Crying...

C: The emotions were totally... I have not cried so many tears in a long, long, long time, because it was really very... But it was not linked purely to that, to that relationship, but somehow, some kind of a **general panic. I don't know what's going on, I cannot grasp it** ... I don't believe, I don't believe the government... I don't know **where to join**, because... I don't even understand it. It's not good here, it's not good there ...or I just don't know **what is good and what is bad**. I feel something again, it does something to me again, yeah(a long exhale)

Note: *Since the beginning of the interview, the client has had a big problem catching her breath. Obviously, this is not a physical pathology (infection), but a feeling of tightening in the area of throat and chest, which she perceives in connection with the feeling of lacking freedom and impossibility to travel to see her partner abroad.*

Dr: I can see clearly... that you cannot catch your breath ...?

C: Yeah. So...(exhales)... so... (exhales and inhales). And that's a fact, it's as if... as if something was dying, as if it **was dying** or... The **internal feeling of the disability to inhale fully** is not like when you are short of breath on a hill, knowing that you will catch your breath later on, but it is some... fear in the background or something in the background, a feeling as if something **kind of necrotises**. That something **kind of necrotises**, yeah.

[Mind; dreams; water; black; tar, like]

[Mind; dreams; dead; bodies; bed, in, are put in bed with her] - necrosis

[Mind; fear; death, of]

Dr: Is there an impression associated with it? Are you saying that something necrotises in you?

C: My lungs are fairly kind of **expanded** and now I feel that I simply **cannot put so much** inside as is their capacity. **And rather, it's just a black colour or some empty space, empty space, not the black colour, rather an empty space, some vague space, a vacuum, some vague vacuum. And as I am used to breathing really, really intensely.** And now I was doing yoga, for instance, and there it goes! But in the regular (mode), kind of then when I am in a normal contact, normal unconscious breathing, then it suddenly starts to **kind of burden and stress** me. Possibly stress or... How come it's not possible and I have a feeling of insufficiency of that intake of breath...

[Generalities; emptiness, hollow sensation; internal]

[Mind; emptiness of mind, sensation of]

Dr: Yes. Please describe the feeling of the insufficient inhalation. You can also use your hands and, in general, be very graphic when describing the image.

C: As if it got stuck...well, I have the volume here, and it got stuck here.

Note: HG: Using her palms, she is touching the sides of her chest, showing that the volume of the width of the chest is smaller than the actual physical capacity, as if it were narrowed.

Dr: Which means...?

C: As a minimum, I can breathe like this (exhales)... in an expansive manner and now it's just like (three times a short cutting exhalation), well the capacity, even though I know it is there I **cannot breathe in fully**.

Dr: As you are holding your chest, where its borders are, and with this gesture you are showing that its volume is limited. Do I understand your gesture correctly?

C: Yes. Well, normally I am used to this kind of an **expansive intake of breath**, it is (inhales)... as if you felt that you can **go on, go on, go on**, and now it's kind of stuck here all of a sudden ... and (inhales)...I cannot ...and there is **kind of a plug**... and you... cannot, you know that the **space** is there, but... you will not be able to pierce it... As if there were a **plug, which cannot be pierced yet**.

Dr: A plug which cannot be pierced in the chest? What impression does it make on you when this is happening?

C: Stressful. And again, it has to do with freedom, in fact. I **feel that I don't have the freedom of that inhaling**. (Inhales.) That basically (exhales) when I am fully aware and fully present, I am capable of it, like when I relax, calm down fully. **It's about the chest**, sorry, so I will here ... my whole body goes down (exhales) and then I kind of give it attention, **calming down**.

C: So, when I kind of calm down, when I become aware or kind of unwind through this kind of **total attention to breath and slowness and intake of breath, exhaling**... (inhales)... Then it is all right. But when it is basically kind of in some usual (mode), or communication...(inhales-exhales rapidly) ... It kind of aches me, knowing that there is... That it is not nourishing there. Now, that breath as if it could and it simply tends to lead me to some **absence of freedom and I feel this absence of freedom from every**, now kind of, from every information arriving. I **cannot fly away, I don't know when I will be allowed to**...my partner cannot fly to see me, not knowing, when he will be able to do so, it's even worse there, because the system, **Erdogan simply lies there**...and they are 70 million and there it's on a large scale, **an awful lot of people are dying**, they already have more of it than (a heavy intake of breath) Italy and (exhales)...

Dr: (gasping for breath)

Note: At this moment, I felt that I could not breathe, that my chest was heavy, that I could not expand my lungs, that it was very tiring to breathe, that I was lacking freedom

to breathe, that I had to make effort in order to get a volume of air inside. I fully succumbed to the descriptions of my client.

C: You can sense it from me, can't you?

Dr: *(again, a painful intake of breath and exhaling)*

Note: *I am struggling to be able to breathe freely. Breathing has become increasingly heavy.*

C: Well, and **making a hole there, really, in order to breathe better, so that the oxygen can simply enter from somewhere else, as well** (laughter).

Dr: What? A hole? Where would you want to have it?

C: **Here in between the chest, between breasts, in the breastbone, in the middle of the breastbone.**

HG: *Pointing at a place in the upper third of sternum, in the middle. Slightly above the notional centre.*

Dr: Yes, I see, there you would want to have a hole?

C: Yeah (exhales). But the **intake of breath, which is insufficient, is sideways**... It is on the sides. It is not going up or down, it goes to the sides. Here I feel kind of (laughter), it looks as if I stuffed my tit (laughter) *(note: as if her breasts bulged)*, but here I feel that there is simply much more ...

Dr: What are you showing with this movement, what is this gesture?

C: That there is much more, a bigger **capacity, which is not filled. Lacking what it is used to**. I know **MY POTENTIAL**, the scope...and what it brings me and now...

Dr: Yes...

C: And now, only when I calm down a lot and really move my attention. And I really have to be calm, which I have found rather difficult lately, then there ... (grg) sorry... then I am actually **sufficiently nurtured with my breath**. But in the normal (operation, mode) I am not. I really have to go into kind of a meditative state...(inhales) to feel **NURTURED with oxygen. (%)**

Dr: Yes, hmm...

C: So. And the freedom. Basically, **freedom** is a permanent topic for me **and I feel that I am now kind of a puppet in someone's hands and that I cannot do anything at all.**

[Mind; delusions, imaginations; influence, is under a powerful]

Dr: Yes, hmm.

C: Actually nothing and it really cost me a lot ... kind of energy and attention to remain... Last week, I was actually completely down...I haven't experienced **such anxiety and sadness** for a long time. But in my case it's terribly **linked to freedom**. It is linked to the fact that I basically kind of... I have never been through this, such kind of, probably no one from us, but I will talk just about myself ... I have never experienced such **helplessness, the fact that I just don't have it in my hands**.

I cannot fly now...let alone travel, not even cross borders... At once, I have also realized the fact that I always used to claim to love being alone, well yes, I probably don't mind it, but the absence of freedom...to basically **go out somewhere**, even seeing one's own family...is (exhales)... in fact **affecting my life in general**.

And now I kind of... well, it **dredged up a lot of shit**.

[Mind; dreams; dirt, dirty; toilets, dirty]

C: That this (the situation of epidemic) dredges up a lot of **unclarified topics**, which kind of **get cleansed** in this situation a lot, but now it is...we must talk a lot, we have talked a lot, we talk a lot... And I feel that I must be **totally, but totally authentic**. Basically, **totally truthful**. Nothing else is possible. Basically, **what is on my mind, must be expressed, even though it may hurt the other person**, but I cannot basically, I cannot hide it, but then I have, on the other hand I have pangs of conscience that sometimes I could...I could in fact keep it to myself ... and not say it. But I'm not very good at it. And this I feel to everyone. Now I am terribly pissed at our...supporters of Babiš...

[Mind; truth; tells the plain

[Mind; indifference, apathy; welfare of others, to] - a raw uncensored truth

Dr: ehmm

C: Oh, even though I try to say what is, basically, what kind of a feeling I have now, the fact that they are **taking democracy, that they are taking freedom away from me...** here, the government in fact, because **I don't believe that they mean well, that they are doing it with pure kindness and truthfulness, that it is done purely for profit..** It (exhales) pisses me off so much that my parents do not see it or are not capable of seeing it or are not open at all to take a slightly different idea and just look into it; in fact, they defend him a lot... And I have such a feeling that, basically, here like **JOAN of ARC I will be basically fighting for some truth...**

Dr: Aha, Joan of Arc? Fight for the truth like Joan of Arc...

C: (laughter) I don't know, it has just occurred to me, it's not like I would invent it somehow (laughter).

Dr: Yes, continue.

C: Well, basically, that I am supposed to walk with some flag and **just fight for the truth...**

Dr: Yes, yes...

C: **To be able to be free.**

Dr: Yes. Aha. And this is done by Joan of Arc, please explain this to me...

C: I don't know, I don't know. Perhaps I just saw her as some **martyr** or just...

Dr: Tell me about it...

C: A person, but...I don't know why, just this way...but probably a woman...I don't know...possibly **truthfulness**...or the **truth of mine...my truth to be EXPOSED**...so so...

[Mind; delusions, imaginations; coating around him, has a] - coating covering the truth

[Mind; truth; tells the plain] - inner truth exposed

[Mind; delusions, imaginations; devil, devils; connected to, he is, arrogant towards those who strive to purity, light and love]

(**note:** you can translate the rubric freely: "**god, connected to, she is, arrogant and violent towards those who are lying to and oppress others**" = Joan of Arc)

Dr: Tell me something else about Joan, about her truth?

C: I really don't now at all. I really don't know why I have said it.

Dr: Never mind. OK.

C: Yeah. (inhales exhales)...weeell...

Dr: Never mind, please talk about what you want.

C: And now I'm kind of **all sweaty**; well, speaking about the physical, then with this intake of breath I become all sweaty. I kind of **have the feeling of fever**, but I don't have a fever. But having this, also now when we are talking... But this is not just now, I have observed it **when I kind of become furious**... Also last night when I was alone. Again, I kind of was reading (the news on corona virus) ... I don't watch television, but various news kind of travel to you anyway, from FB... **they will fly to you**... And I kind of extract something... And so I become entirely furious again, always really, so I kind of tell to myself, look I have a fever...yeah, I kind of start, **start to burn**. My hands are sweaty, below my breasts, basically **my cheeks are burning**...

Dr: Your cheeks are burning, you are burning, you are all sweaty from it...

C: The forehead...So I feel basically all sweaty, really...kind of... **Seeing red**... But this is **probably also due to the rage and hopelessness at the same time**.

Dr: Aha. Will you tell me something more about this condition? Will you please try to describe it to me more?

C: (inhales) You mean the sweaty or the furious, the seeing red...the pissed or the hopeless condition at the same time?

Dr: Yes, everything you say.

C: There is kind of a **terrible helplessness** to it...(pause)... Like just nothing...that I am kind of **in the hands of God** (laughter) or I don't know, that I am in someone's hands, rather not in the hands of God ...I am trying to say here that it is... basically, May the God's will prevail. This has helped me initially... to really see it as... **May the God's will prevail and it will be cleansed...it may also cleanse the relationship of ours, a great deal of things will move forward, it will move me and him there or there, May the God's will prevail.**

And... now I have a feeling it is not just about the will of God, but now there are basically also the figures here, the **clown-like government figures, turning us into puppets**, they are playing with and there is basically no... Even though many people kind of cry out here, many people are against it, and I feel utter helplessness around it.

And it's not just due to kind of being pissed off, it's due to some kind of an internal thing...kind of... It is killing...the helplessness of this kind of **systemic hell**...it pisses me off terribly... And I kind of really do feel, even though I will argue with my parents here and I will just have a quarrel with them, because I just want to **open their eyes** for the approach, don't tell me that he means well with us, and not being him, almost **all of us** would end up **dead** here...

[Mind; despair; religious]

[Mind; delusions, imaginations; torture, about]

[Mind; delusions, imaginations; trapped, he is]

[Mind; dreams; death, of]

[Mind; dreams; death, of; dying, of]

[Mind; death; thoughts of]

[Mind; fear; death, of; noise of door moving, from, in dark]

Dr: Yes

C: But... Still, even though I will quarrel with them, I can feel such **terrible helplessness** there **that this will not help anyway**. That the assholes here, the entire system, I basically feel some kind of a **systemic error**. This makes me... Perhaps if there were this, May the will of God prevail, that it is in the hands of God...then you will just say OK to that. I would probably say OK to that. Not probably, but for sure. But this systemic error,

which is here, there, there, there...nothing in fact, the game we used to play, in the vein of some **unions** (EU), **entities**...at once nothing works! **The ENTITY basically does not exist!**

Dr: The entity, yes...

C: The entity does not exist. It is actually **disintegrated**... its **every little part, every error in that little part fights basically for snatching as much from it as possible**... and this pisses me off. But at the same time I feel terrible helplessness that, basically, we in fact...cannot do anything about it. That even if there is a **mass of people** here, nobody will be able to do anything about it, sort of. I am basically pissed off by this non-principle of having a great deal of smart brains here and a great deal of companies here, we, the Czechs, **can** basically produce lung ventilators in this country, **we are capable of** sewing masks here, **we are capable of** producing filters for these home-made masks here... And the government purchase goods worth of 1.7 b here from the Chinese gestapolike assholes, basically yellow bastards. Of whom I know how they behaved to me, to my partner a month ago now. And the thing, as I have had this so very recently, this emotion of what a gestapolike country this is, actually... How communist, controlled it is... So this is what **seizes** me even more, because I have this very fresh personal experience from January!

Dr: From January, that was...That was in January, then, ehm...

C: I flew... across China...actually, my partner flew back on his own. From Dubai, because he had been arrested before, because they had believed him to be a **spy**. So we first had these troubles... And there was this flight back, we said, OK, looking at it **economically we cannot**, because his return ticket cost 15 thousand, yeah, so we cannot throw thirty thousand out of the window, sort of... we didn't really want ... So I said, OK, they didn't make me any problems, so I will fly...(inhales) Alone...and I flew, actually Phuket-Kunming, which is, I don't know whether it's actually right in that province... It is around 790 kilometers from Wuhan. In Kunming, there I waited for around five hours, here among those **coughing Chinese**, practically the only European there at the airport...local... There I flew from Phuket with those tourists who really do behave like pigs. There, a woman was sitting in front of me, and she **was coughing the entire hour and a half... She was coughing and coughing and did not put on a mask, she did not put her hand in front of her mouth and just did** ...(showing long, disgusting coughing)...**Because they are basically pigs**...

[Mind; dreams; journey, travelling; peking, to] - oppressive regime, travelling=spreading

[Mind; dreams; journey, travelling; russia, to] - oppressive regime, travelling=spreading

[Mind; dreams; journey, travelling]

[Mind; delusions, imaginations; influence, is under a powerful] - external or internal oppressive force / power

[Generalities; constriction; band sensation; belt, as of a] - external oppressive force / power

Dr: Yes, aha...

C: They were even bossing me around that there were empty rows that I could not sit there, and some **little Chinese bastard** went after me.

Dr: Oh yeah, hmm...

C: I beg you pardon, I am being terribly rasistic right now. Because after this kind of experience there, I have returned as a racist.

Dr: Yes?

C: As I have never kind of liked them, but this... Basically even **aggression towards them**, I have never felt it.

Dr: Hmmm

C: At this, at this airport in Shian...which, for a change, is thousand kilometres from Wuhan...This is already a kind of an international airport, so there again **gestapolike manners**, here the way the immigration police treats you, or just police, basically, well, they treat their own people this way, as well, it's not just me. So... that was just terrible...

Dr: Yeah, yeah hmm. Well, that must have been...

C: Yeah and... At the airport in China I actually, I actually couldn't buy anything, because they did not accept credit cards, they did not take euros...I had euros, dollars, a credit card... I wanted to **buy water**, because I was there for three hours! I didn't buy it. They told me, only Chinese money ... One cannot even make oneself understood and that is simply... And now you can see here what our government do, well, they simply... collaborate with them here, yeah...pause...(exhales deeply)

Dr: Yeah (exhales)

C: **Being outside helps me. I go for a walk every day**, but it's also getting on my nerves already, because I keep on walking the **same radius** here all the time. Now I'm **on fire, I'm awfully hot, I sweat like a pig**.... Soo...like **outside it helps me a lot**, I go out virtually every day. I spend at least one hour somewhere, a fast walk outside.

Dr: What helps you when you take a walk, please?

C: I don't know, being outside. There I have the **feeling** of some kind of **freedom**, well... a little stronger than at home when I am outside.

Dr: Do you observe anything else improving when you are taking a walk?

C: I can certainly **breathe better** there (laughter). For sure, because I mostly also make a phone call with somebody and am not in these states.

Dr: When you are outside, you are not in these states, right?

C: (inhales) Then I'm not in these states, exactly (exhales).

Dr: Aha, aha... Have you noticed any other physical symptoms?

C: Look, what worries me is that lately...here, the **urine leakage** of mine, **the fact that I can't manage to pee on time and now I tend to go pee all the time**. I don't know whether I have caught a cold or it's somehow somatic... Or it's just, I feel that it's some kind of urine marking, yeah... That it is kind of some...I don't know. I don't know. I don't understand it, but I have such...I cannot describe it, really. But I feel that it is...(pause)... That it is simply...something linked to some kind of a defence or... But I don't know, I don't know. That's a fact, I cannot look behind it, but this is just some kind of an internal feeling. Something kind of, that it is, that it is **linked** with something, with some kind of a **fear**, this urine leakage.

Dr: With fear? Try to describe it to me, a connection with fear, you perceive?

C: I have it kind of (laughter)...I don't know whether it will sound probably like a complete bullshit now, but... Like when dogs **mark their territory**, so I have a feeling that it is kind of a **territorial marking** of something...but I don't know, yeah...But of course, usually it happens to me at home, which I don't understand, yeah. This does not happen to me at work, this does not happen to me anywhere else that I would **not be able to reach a toilet and leak urine**. But it tends to happen to me at home, but I feel that it is something kind of... But I don't understand it...really, like I can't get behind it. But I do have a link, because, look, now I ...I have been doing my **abdomen** for a month now. I exercise every day...I really do, I **work out** a lot... So, something muscular or other... **I'm young, I'm healthy, I don't have any inflammations, I don't have anything**...so, well, I don't think that this would be some kind of a problem, some urological problem... But I simply have a feeling that it is really kind of somatic and some kind of marking... But it does not go well together for me, I am unable to follow the logic behind it, I only have a feeling of something territorial and somatic... And this is something that kind of worries me and I feel that it has deteriorated now.

[Mind; fear; dark, of; stool and urine, with urging for] - reaction to dark/light with physiological urge to cleanse or void, it has many narrative meanings for different Ozonum clients depending on the context, it is very strong pointer to Ozonum prescription, most cases of Ozonum have got it, either as a part of their history or as present symptom.

I remember one client who had to go to toilet (poop) every time I asked her a clarifying question. She said to me she do not know how to answer and immediately had to run commenting there is formication in her tummy and bowels and she has to go to cleanse

it. It was impossible for her to resist it as if her body creates to her a state, she doesn't enjoy but there is no other way than to sustain it. She felt very much relieved after every poo or voiding, at least until the next question I asked her. This is verified symptom of Ozonum. Mark as 4. grade in repertory.

Dr: Yeah, yeah

C: It's not that I would be wetting myself, but I simply **go, run, run, run... I'm taking off my panties and sort of "drip"...**

Dr: Does this happen just before that?

C: Yeah. Just before. I take off my shoes, I take off my jacket...run to the toilet...and it is **always** kind of **sudden**. It's not that I want to pee, I want to pee...and suddenly an acute urination comes. And it happens to me only at home, it doesn't happen to me at work, it doesn't happen to me outside, it doesn't happen to me in restaurants... I can be outside... basically, shopping, something, something, something... But as soon as I come home, this happens to me.

Dr: Ehm. And how to understand the territorial thing? Is this related only to your home?

C: I don't understand it either. This is some kind of an internal feeling. I don't know, it's some kind of **a threat, and thus I leak urine...**

Dr: Do you feel endangered at home?

C: No, no, no. Being at home, I feel really safe and well here. But I don't know...it's as if I **marked my territory in order for it to really be my territory...** I don't know... I have some kind of analogy behind it, but if it's correct or it may be a total bullshit. That it is simply something territorial and linked to kidneys...but I don't have there any kind of, basically, further link. Kidneys, territorial, urine leakage like a doggie.

Dr: What if we put the dog aside now if it's OK for you and focus only on the part of what you are experiencing. What is the territory about?

C: I don't know. Whether it's like kind of...safe here...I am always running up from the door to the toilet, really,...you know the way it looks like here...so here it's safe?... I really don't know.

Dr: Can you think of something else from nature besides a dog? Other creatures mark as well.

C: I understand... pause... I have thought of (laughter)...I don't know it again, I cannot say I would be a real expert in it, but I don't know why suricates occurred to me, yeah. But suricates and a community have come to my mind.

Dr: Weeell, tell me about it...

C: But it rather occurred to me... I don't know why this has occurred to me at all. Because it totally kind of ...

Dr: Explain me the suricates. I wouldn't want to address the question why now.

C: Suricates came to my mind, **community, family, protection, cooperation.**

Dr: Please elaborate on the topics you have listed.

C: (pause)...**Protection, family, cooperation**...(pause)...

Dr: These are the main subject areas if I understand it correctly... And what do they mean?

C: So, in this situation now, it's more or less me who actually holds the family together... (pause)... I kind of set who, what, why, my parents, **being positive**, go, don't go, do, **protect yourself, because they are like little children**...

Dr: Little children, your parents...?

C: Cooperation with my sister, it works with the second one, it doesn't with the first one... But now, I kind of increasingly become aware of my family, apart from this, I **do not have the other part of my family here**, which is my partner. So now I am purely focused here, but this I miss, **I miss this member there**... Cooperation, namely the fact that...kind of other and other and other aspects are visible...of this cooperation...sorry, I have another phone call, it already makes me crazy. So...

Note: *Her telephone rang. At that moment she started to be inattentive and made an impression of not knowing what to do next, where to direct her attention. I have already observed this phenomenon in other Ozonum clients, e.g. when a partner entered the room or somebody from the family needed something. As if they were unable to pay attention to more people at once at that moment, which made them feel insecure, as if they were unable to concentrate, focus once again.*

Dr: You cannot concentrate anymore, right?

C: No, I can't concentrate. Because now my partner called, then one customer I need something from and now a friend is calling which whom we have arranged to make a phone call...so now I am somehow **distracted**.

Dr: Before we finish I would like to ask you to tell me briefly what is not going on inside of you, what are you experiencing? Several words just on this.

C: How I feel is that...weeell, SHE (speaking about herself) also wants to resolve this, she wants to concentrate on this, at the same time **she wants to be here for the others**, as well. **To find peace, I am looking for peace in order to concentrate on myself and to not be drawn** kind of... from the outside into some distraction...**Be with myself, pay**

attention to myself, and at the same time there is the desire to just be in connection with them as well... Then there is stress from the fact that I will now have five phone calls... And I don't feel like it, I don't want to make some of them... But in view of the fact that I requested them, this customer helps me with something, basically for the business, so I have to answer it kind of, because we have been chasing one another kind of three times today... And again I have... (inhales-exhales)

Dr: Yes, what do you have? What does this mean (a loud breath - I repeat after the client).

C: Again, again **I have the feeling that I cannot breathe in fully, that there is, that there is emptiness in the lungs and vacuum. That I lack sufficient nutrition, nutrition** (exhales)...Well, so...

Dr: So what would you say if I sent you a [homeopathic remedy, providing you with oxygen nutrition?](#)

C: Oh, thank you. And just the last thing...I am totally wet after this interview. I am completely sweaty. My **T-shirt, my pants are drenched with sweat...**

Dr: I have one more plea. Your story fits into my epidemic study. Of course, I would present it absolutely anonymously. May I publish it?

C: You may. Will you send me the remedy by mail. The mail works, I am not about to go anywhere, not knowing even, when the quarantine will end. At the same time, I adhere to it in some way, because I think that I **have long had it** (the virus) anyway. It has been imported from China, here simply in some way, I believe to have gone through it anyway...

Dr: What do you mean?

C: Covid. That I have encountered it already, that I have already had it. I was a little ill afterwards as well, kind of moderately. No temperatures, but basically a sore throat, a running nose, and I had a [lot of herpes coming out.](#)

[Skin; eruptions; herpetic]

[Face; eruptions; herpetic; lips]

My addition to repertory:

[Female; eruptions; herpes] OZON - very common symptom, couple of female clients reported it, it could be recurrent and very upsetting, they feel dirty and are ashamed of it, I made few prescription errors and prescribed **musc-d** instead

[Female; eruptions; herpes; labia] OZON - inner and/or outer labia are affected

[Female; eruptions; herpes; vagina] OZON - 1st part around vaginal ostium

[Female; eruptions; herpes; recurrent] OZON

C: So, I think that I have already had it, yeah. But I don't really know, but I am convinced about it in a way, you know.

Dr: Yes..

C: Also due to the fact that at that time in question, on January 13, having been there since December (*the virus, probably*), I kind of returned from this district. I was at airports among thousands of Chinese, basically, **coughing and sputtering all those snots all around there**, so I think that it's pretty clear about me.

Dr: You haven't got yourself tested, I assume.

C: Well, I'm good. When I have something, I just **sweat**, now I have it a little congested, I am kind of **slightly congested**, but I don't know whether this is from smoking or... I don't smoke, if there may be anything from vaping, well, I just don't know...

[Respiration; difficult; smoke, as from]

[Cough; smoke; from sensation of; trachea, in]

[Generalities; gasses, fumes, smoke, vapors agg.]

Dr: OK, agreed? Call me on the following day when you take the remedy and we will adjust the dosage.

Rx OZONUM LM1 drops daily

Follow up

After the consultation and before taking the remedy:

In the meantime, the client sent me several voice messages to my telephone. We could not find the time which would suit both of us. I sent the remedy immediately, but the delivery of postal items is very unreliable and lengthy. The condition of the client, in particular her mental state, deteriorated, and she waited for the remedy like for salvation.

Voice message 1

Hello, on Saturday we talked, actually, and I told you about some kind of a current state I was in. Well, and then my physical condition, today is Tuesday, has kind of changed. Hmm, I really don't know what this can be. The reality is that I went to the garden after our intake, it was a brilliant sunny day, there I did yoga, on those wooden boards, like well-dressed, but I really did need to **breathe freely**. I didn't want to go for a walk anywhere outside, wearing a mask, and I enjoyed it enormously, kind of, the **freedom of the breath** and also the yoga of mine, which is really kind of focused on **deep inhaling and exhaling**... deep breathing, **filling of lungs**, sort of... now, what I still have inside my head from the ashram... **Take a deep breath so that the oxygen reaches every cell of your body**. So, I really worked out hard and it did me kind of good, the **freedom of that intake of breath**...

On Sunday, I already felt kind of weird, very **sweaty**... But I still told to myself, OK, I will just not be lying around here somehow, it's just this kind of thing... hmmm, **triggered by fear, kind of emotional**, that you feel as if, when I am telling to myself here that I feel bad, then I will feel bad. I say **do not succumb to this kind of mass insanity here outside** (clearing her throat) Screw it... Otherwise, you feel kind of strong, so go for it, but there is still some kind of a **limit of those lungs** or of what I did on Saturday. So I worked out as usual, but during the **exercise I can breathe well!** Paradoxically... But then, I still kind of feel **in the middle of my breasts**, kind of on the chest, I cannot say at the end of the chest exactly, but really kind of in between... as if you feel the hole between, so there as if **some phlegm sat and I would need a brush !!! for the dishes to kind of go through it**. You know, **to take a tube and kind of take it out**, or kind of ... simply **to pull it out using violence**, kind of using a brush, a brush, simply outside. And this is not that foam brush, this is the old brush we used to have at home, kind of, when I remember, my mum, what she had, then really this brush. Well, and that was Sunday...

Aaah, on Monday at work, I was already totally enraged and **I succumbed exactly to that panic**, kind of, oh my gosh, I probably have it, I shouldn't go to work, because there will be people and I will infect them... which is the worst for me, kind of, like, not that I myself would have it, but the fact that **I will infect somebody, and God forbid, something ugly kind of happens to them**... (clearing her throat). Well, nevertheless, I went, I was actually disagreeable due to this, because my body didn't really, in fact, an

overall fatigue, kind of...I also took my temperature in the morning, because I didn't feel entirely...basically, I didn't have 36,5...36,6 so absolutely all right, but the **body was kind of burning**. Or I cannot say that it was burning, but it was not comfortable in that it was kind of overheated. And then I made it move somehow, I worked out as usual in the evening, everything fine, I am going to bed, and again this...kind of, always when I work out, for instance, then I don't perceive it. But then I stop and **perceive the weight on those breasts or the mucus sitting there, kind of, which blocks something there, kind of** (inhales-exhales).

Well and today I went to work... and again, the permanent tendency (shows clearing of her throat)... **The attempt to kind of pull it out of myself**. But it's still kind of in the same place, **not moving at all**. Then I also coughed a lot, kind of, I had a feeling that I was getting it out...but it's still there. It's still there, it doesn't rasp in me somehow, but there is a kind of **some settled sludge, which I cannot get rid of**. And basically, it's there all the time.

And feelings or rather ideas are running through my head... What is it? How should I behave... Something tells me, just act as if nothing happened, because it's nothing. And something tells me, you should pamper yourself... Something tells me, not only should you pamper yourself, but you should care for the others outside. You are irresponsible, going out, kind of.. I don't go out, I just go to work, where **I see the same folks**... But they are just there. And we all know what risks we run, being there together... At the same time we are just there, we discussed this a million times, basically,... We all have to come into contact with it anyway...

So this is the current summary on the physical experience.

Report 1: a plethora of typical statements of the client, needing Ozonum.

The metaphor of the brush, used to wash the dishes (or a toilet brush), is interesting. Something used to sweep the mess away.

Animals symbolise instincts which must be suppressed or are a metaphor of bacteria, waste bacteria, which must be stuffed back into the waste pipe using a brush to prevent them from infecting anyone.

Knowing the commercials for toilet cleaners. I believe this is expressed by this rubric.

[Mind; dreams; dirt, dirty; toilets, dirty]

[Mind; dreams; animals, of; getting quick, has to destroy them; stuffs them into the toilet]

[Mind; dreams; confused; streets, walks unknown; snow, obstructed by piles of]

- here are piles of snow, mucus in the respiratory tract - well known

[Mind; delusions, imaginations; snow, sees black snow blankets]

- the respiratory tract is covered with mucus, which cannot be coughed out

Voice message 2

(clearing her throat) Hello, so I will try, I will have an appointment, I will record fast what was going on and what it going on... So yesterday I... During the day, I kind of felt an **overall burden... I had a terrible headache and a brutal pain in my back.** I don't know. So, I'm telling myself (clearing her throat) whether all this is not from some... I don't know from some pinched nerve, somehow even exacerbated by this, what has been going on for several days in a row...this kind of a **disability to fully inhale, but mainly the phlegm settled only down, basically, between the breasts.** So, I don't know, really... I don't know what this is. Well, in any case, yesterday the headache was just terrible, since I feel, **on the whole, as if I am to explode...** I am kind of **clogged, pissed, in pain...** Basically, totally... Then I also did my yoga exercise... I already felt, of course I felt the phlegm as well, but I still worked out, kind of, well...

I told to myself, I would go to bed early, kind of, because I was really tired, I would rather wake up early in the morning, I might work out and go to work... Ahh, and as I lay down, then it started, this kind of (showing how she was clearing her throat)... **The need to pull out the phlegm which is between the breasts.** But...**I couldn't do it...** Well, and when I lay down, then I **always when I kind of tried to swallow, then I had a feeling that I was suffocating**, and having had a lie-down, basically, I sleep with just a small pillow, so I kind of sprang up (showing an abrupt panic intake of breath)..as if when one **sits down quickly, because you cannot breathe in.** Or because something is happening to oneself and now I have a feeling that I kind of turned into a psycho or got into a **terrible panic, from it all here what is going on.** But that evening, kind of, the night, the experience was just terrible for me. I said when I **lay down (inhales), then I would be unable to inhale (exhales)...** So I sat in a half-sitting position, I took Mucosolvan, then I ate a banana in about half an hour, hoping that the **BANANA might actually pull down the phlegm** and it would be, kind of, better...

Every time when I kind of speak and breathe with my mouth, then (clearing her throat) it is much worse. Ahhh... every time when I kind of try (inhales) to calm down and inhale with my nose (exhales), then I kind of reduce the **panic, as if I were to die...** (inhales-exhales). And this works...(breathing). Still, the **intake of breath is not full**, I cannot do it till the very end. I have a **feeling of oxygen insufficiency, I simply miss oxygen.** (inhales-exhales) Then I would have to breathe this way all the time, which is extremely difficult, and there is still the panic behind it, anyway...(inhales) that (exhales) this is not sufficient... So, I went cooking some herbs, which I have from a Tibetan...it was about two o'clock in the morning... I was sitting there...playing a game on my cell phone, with my head falling, I was afraid to lie down. (an abrupt intake of breath) Well, it got better in the sitting position... And while lying, I basically had (clearing her throat)

I feel kind of **that when I swallow, also now, normally...that it frightens me... As if the entire tube simply narrowed to... (inhales) a straw, to a size of a straw or**

smaller, and that there is basically an insufficient pull (cough) and that it cannot, kind of, sufficiently nourish the lungs. It forces me all the time, the phlegm is simply still there, I can get it slightly higher, and it falls back there again. I am really desperate, because I think that if it weren't for this stupid corona here, I would simply tell myself, I am sick, and I will manage somehow. But with all this panic which I trigger in me due to this, and the fact that I don't have my man here, that I am alone here... that at night one cannot kind of ask anyone... one has no support anywhere, one has to manage on their own...So this, kind of , completely paralyses me... (cough)...

Well, and this is happening to me, basically. The phlegm goes up a little bit, kind of, **kind of clogging the way, and I stand no chance, kind of, to get (inhales with panic) a quick intake of breath there (exhales). But I can feel that it's panic, that it's mental, that... well...so basically corona, corona, panic...**

Perhaps, I am just full of phlegm, perhaps I have just caught a cold, I don't know, perhaps I have conora, I don't know. But the **panic around me kind of preys on my mind more than (cough) the (cough) physical symptoms alone.** I try to kind of **get it out of myself, but I cannot do it.** I simply can't.

Report 2: is a typical statement of the client, needing Ozonum

[Throat; choking, constricting; swallow, swallowing; agg.]

[Throat; swallowing; difficult; chilliness, with] - chilliness is any state of mental disorganization.

For other rubrics see **OZONUM PENATCHORD**

Rx: I recommended the client to put a drop of Ozonum into a glass and to keep drinking it the whole day, when she has the remedy on her.

The next day after the remedy

This is a transcription of a recording of a sound track which she recorded me on the telephone. Apparently, she took to the fact of not being obliged to talk to me, being able to record what she needs:

Good morning (cheerfully)... So, I'm calling, not calling, recording the morning emotions... Look (laughter), it's been a ride (clearing her throat). I don't know... I simply don't know, kind of, but I feel nice. Well, it's good, it's good. Already at around 12 in the evening, I went to bed at around twelve. Well, you can still hear in my voice that I am still full of phlegm, but the **freedom of breathing is at a completely different level.** Already at twelve, I told to myself, wow, I **already don't have this lump basically in the mediastinum...**

Knowing this, I went to bed, kind of, without panic of not being able to inhale, even though I kind of swallowed, there was kind of a much bigger freedom. Look, I **slept like a baby**, but totally, really. I got up in the morning... I kept pressing my alarm clock every ten minutes for about an hour, because I felt I had to catch up on my missing sleep over the last days, basically... Ahhh...I feel a certain **liberation.** (snuffle)

As I have said, I am still full of phlegm, but the lump in the mediastinum, causing me this **panic of not being able to inhale**, is no longer there... And the volume of phlegm is not brutal in any way. I got up a while ago, so it might during the day...now I'm actually speaking to the first person, actually, whom I'm speaking to, or for whom I am recording or to whom I am speaking.... Well and it's basically kind of different... It's different and it's good. (laughter) I'm terribly happy (laughter)... I'm so happy (laughter)... **I am laughing to myself here** ... Well, those are probably the first impressions... now I don't know what to do about the dosage...call me or write me about it later... What to do next... I will have breakfast now and go to work. Thank you, (smile) have a wonderful day, bye bye!!!

= FINIS CORUNAT OPUS=

OZONUM - the remedy of our time

I expressed my belief since the beginning of epidemic that **the remedy Ozonum covers a wider indication range** compared to the conventional definition of a disease-centered genus epidemicus (DCGE).

I am convinced that the Ozonum dynamic very well resonates with contemporary challenges we have experienced globally and on an unprecedented scale. It ranks the highest among the prescription in my practice. In my modest opinion Ozonum deserves to be called due to its wide range of applications **THE GLOBAL IMPACT REMEDY**.

It seems to me that the dream of the inner reality of ozone has become a dream of global (and consensual) outer reality of contemporary life in general. This is, from my point of view, the PQRS in this particular coronavirus pandemic.

I start to call ozone after seeing numerous cases and understanding more the underlying dynamism the BLUE protector of life space and primordial breath of life.

I would like to also invite you, each of you, to cooperate on the **GIW (GIVE) - Global Impact World project**. I dream to do a multi-centric homeopathic epidemic study and every hand, brain and heart will be needed and appreciated.

I believe we can do a great deal for mankind and the world as homeopaths now. I think that if we carefully document each successful Ozonum and another prescription, we will collect a statistically significant sample together. Consequently, we can present clear evidence of benefits of homeopathy and its effectiveness in service society and humankind.

Soon I will launch the webpage called:

www.GLOBAL-IMPACT.world

My team is working hard to make the website ready for you. It is still under construction.

Do not hesitate to contact me in need of further clarification.

With best regards and wishes of well-being,

Dr Petr Simeon Gajdos (CZ)

SAVE YOUR COUNTRY

One by One that One

One day, an old man was walking along a beach that was littered with thousands of starfish that had been washed ashore by the high tide.

As he walked he came upon a young boy who was eagerly

throwing the starfish back into the ocean, **ONE** by **ONE**.

Puzzled, the man looked at the boy and asked what he was doing. Without looking up from his task, the boy simply replied,

"I'm saving these starfish. If I don't throw them back into the sea, they will die from the **lack of oxygen**, Sir".

The old man chuckled aloud, "Son, there are thousands of starfish and only one of you. What difference can you make?"

The boy picked up a starfish, gently tossed it into the water and turning to the man, said, "I made a difference to that **ONE**!"
